Interfaces for human proctoring

Integration with LMS and test platforms

Analytics and reports

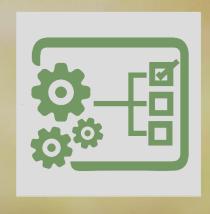

INFRASTRUCTURE OPTIONS

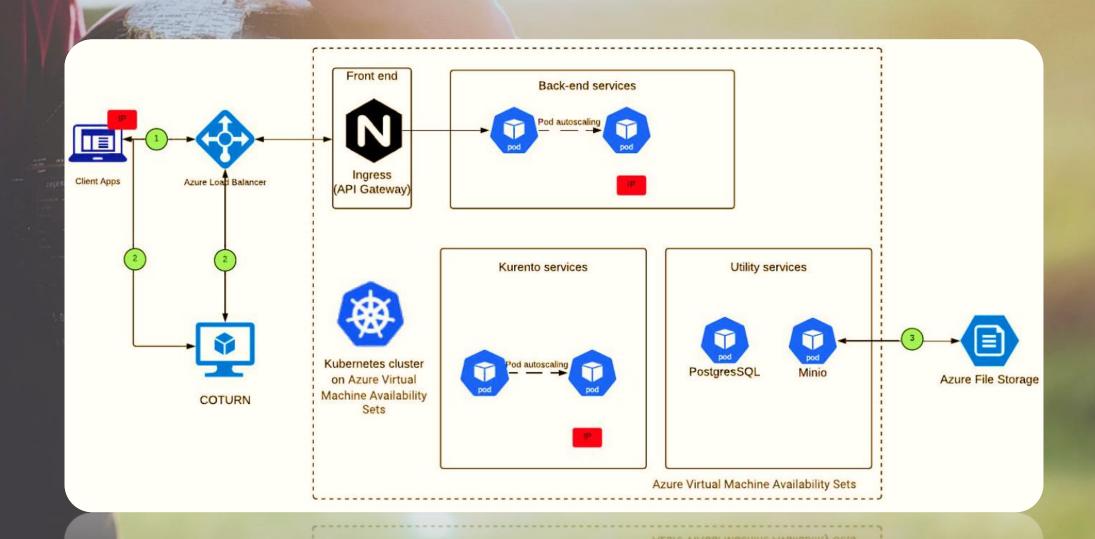

I. Examus cloud server

II. Customer Cloud Server

III. Customer Infrastructure

EXAMPLE OF SOLUTION ARCHITECTURE

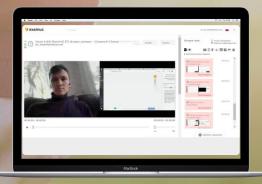

THREE PROCTORING OPTIONS

1. Automatic

- Test-taker identification
- Recording audio, video and desktop
- Detailed report on violations
- Violation probability calculation

2. Asynchronous

Automatic PLUS review of recording by proctor

3. Synchronous

Automatic PLUS
live monitoring and
exam control by proctor

USE CASE 1: ONLINE ENTRANCE EXAMS AND ENROLMENT TESTS

Our online proctoring service helps universities expand their intake outside their home countries, with online entrance exams verified by technology and people.

National Research University Higher School of Economics was one of the first educational institutions to implement our online proctoring solutions. Today it accepts students from more than 100 countries.

NATIONAL RESEARCH

USE CASE 2: MASS EXAMS VIA MOOC PLATFROMS

Examus' service has been integrated with leading MOOC platforms like Moodle and EdX.

Online proctoring guarantees the transparency and authenticity of exams and testing on MOOC platforms.

Since 2015, Examus' service has handled more than 800,000 exams on OpenEdu, one of Russia's leading MOOC platforms.

USE CASE 3: ONLINE OLYMPIAD

Examus' online proctoring solutions have been successfully implemented for a range of K-12 and university competitions online.

The most popular option is asynchronous proctoring. All participants are verified using automatic proctoring. Those who achieve a pass mark are also reviewed by human proctors.

ATTENTION AND ENGAGEMENT MONITORING: HOW IT WORKS

- 1. The service works in the browser on a laptop or smartphone. It gains access to the camera
- 2. The system analyses the video stream directly on the client device
- 3. The customer receives real-time analytics on user behaviour

The system focuses on two key metrics:

Attention – using gaze detectionEngagement – using facial key point dynamics

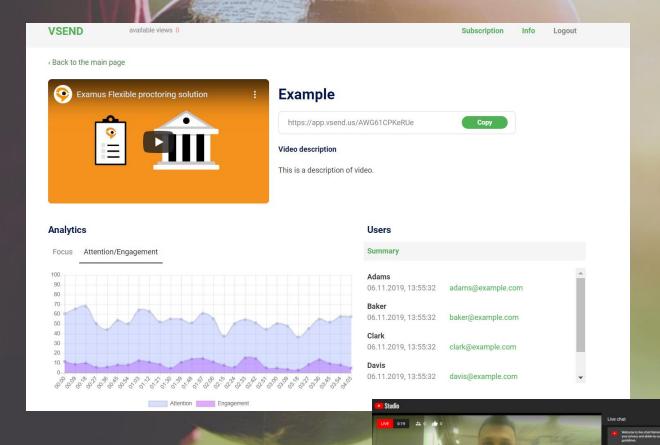

BUSINESS CASES

- Real-time analysis of how students or employees respond to video content
- Real-time feedback from live webcast audiences
- Evaluation of response from distributed focus groups for promo videos etc

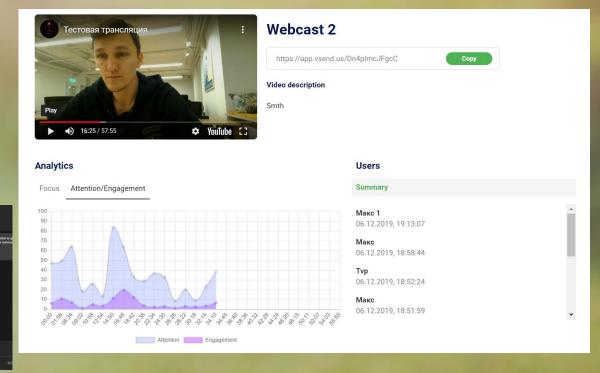

INTEGRATION WITH YOUTUBE

- 1. Uploaded video analytics
- 2. Live streaming real-time analytics

BUSINESS MODELS

VOLUME BASED

Starter option or one-time project

From \$3 per exam

Universities

SUBSCRIPTION /
LICENSE

Limited volume at lower unit price

From \$36K per year for 12 000 of Exam hours

Enterprise, MOOCs, large universities

WHITELABEL

Built-in feature for platform

From \$100K

Partners

WHY EXAMUS?

Cutting-edge software

- Chrome-based browsers, Mozilla Firefox compatible
- User-friendly and secure, choose your option: web app or extension
- Multilingual interfaces

Flexible business models

- Volume-based
- Subscription/license
- Whitelabel

Turn-key service

- Tech and user-support centre
- Monitoring centre from scratch: methodology, training and guidelines
